Job Description

The role of the Project Manager is to plan, execute, and finalize projects according to scope, deadline and budget. This includes directing resources in a matrixed organization and coordinating the efforts of team members in order to deliver projects according to plan.

The Project Manager will also define the project's objectives, participate in project planning during and after the sales cycle and oversee quality control throughout its life cycle.

Responsibilities

- Define project scope, goals and deliverables that support the business goals and requirements in collaboration with account sales executives, senior management and stakeholders.
- Proactively manage changes in project scope to maximize success and minimize risk to the customer and the company.
- Meet with clients to take detailed ordering briefs and clarify specific requirements for the contracted scope of the project(s).
- Develop complete project plans and associated communications documents.
- Apply Siemens project process and management principles at all aspects of project scope and deliverables.
- Effectively communicate project expectations to team members and stakeholders in a timely and clear fashion.
